We are a toddler and preschool program which is a very special place for fifty five children, their families and staff.

In our school we value the child's way of communicating, thinking and feeling. We try to help our young children ask their many questions, begin to solve problems, to consider and make choices, to be responsible, to trust and love others and to play and work cooperatively.

We are now seeking to hire individuals who would like to join us, bringing their knowledge and experience and who will add their hands, hearts, minds and spirit to the school.
